Can. J. Math. Vol. 43 (6), 1991

AUTHOR INDEX FOR VOLUME 43, 1991

ALLEGRETTO, W. AND L. S. YU Decaying solutions of $2m^{\text{th}}$ order elliptic problems 449
AMOS, RON See Chui, Charles K.
ANDERSEN, KENNETH F. Weighted generalized Hardy inequalities for nonincreasing functions 1121
AUINGER, KARL Boolean congruence lattices of orthodox semigroups 225

BARLOW, MARTIN T., STEVEN N. EVANS AND EDWIN A. PERKINS Collision local times and measure-valued processes 897
BATOR, ELIZABETH M. , RUSSELL G. BILYEU AND PAUL W. LEWIS The Vitali integral convergence theorem and uniform absolute continuity 939
BENABDALLAH, K., B. AND CHARLES, A. MADER Vertical subgroups of primary abelian groups 3
BERKES, I. Nongaussian limit distributions of lacunary trigonometric series 948
BILYEU, RUSSELL G. See Bator, Elizabeth M.
BLOOM, WALTER R. AND PAUL RESSEL Positive definite and related functions on hypergroups 242
BOJDECKI, TOMASZ AND LUIS G. GOROSTIZA Gaussian and non-Gaussian distribution-valued Ornstein-Uhlenbeck processes 1136
BORWEIN, JONATHAN, SIMON FITZPATRICK AND PETÀR KENDEROV Minimal convex uscos and monotone operators on small sets 461
BRADLEY, R. E. On induced operators 477
BRAUCKMANN, BORIS The 2-Sylow-subgroup of the tame kernel of number fields 255
BRUNGS, H. H. AND J. GRÄTER Value groups and distributivity 1150
BULLEJOS, MANUEL AND ANTONIO M. CEGARRA A 3-dimensional non-abelian cohomology of groups with applications to homotopy classification of continuous maps 265
BUNTINAS, MARTIN AND NAZA TANOVIĆ-MILLER Strong boundedness and strong convergence in sequence spaces 960

CEGARRA, ANTONIO M. See Bullejos, Manuel
CHARLES, B. See Benabdallah, K.
CHUI, CHARLES K. AND AMOS RON On the convolution of a box spline with a compactly supported distribution: linear independence for the integer translates 19

COLBOURN, CHARLES J., ALEXANDER ROSA, AND DOUGLAS R. STINSON Pairwise balanced designs with block sizes three and four 653

DE KONINCK, JEAN-MARIE , ÍMRE KÁTAI, ARMEL MERCIER Additive functions monotonic on the set of primes II 705
DESLAURIERS, GILLES, JACQUES DUBOIS AND SERGE DUBUC Multidimensional iterative interpolation 297
DROSTE, M., W. C. HOLLAND AND H. D. MACPHERSON Automorphism groups of homogeneous Semilinear orders: normal subgroups and commutators .. 721
DUBOIS, JACQUES See Deslauriers, Gilles
DUBUC, SERGE See Deslauriers, Gilles
DUFF, G. F. D. Navier Stokes derivative estimates in three dimensions with boundary values and body forces 1161
DUNKL, CHARLES F. Integral kernels with reflection group invariance 1213

ERBE, L. H., K. GĘBA AND W. KRAWCEWICZ Equivariant fixed point index and the period-doubling cascades 738
ERDÉLYI, TAMÁS Bernstein and Markov type inequalities for generalized non-negative polynomials 495
EVANS, STEVEN N. See Barlow, Martin T.

FERLAND, RENÉ Fluctuations pour des équations de Boltzmann scalaires 975
FERNÁNDEZ, BEGOÑA AND LUIS G. GOROSTIZA A criterion of convergence of generalized processes and an application to a supercritical branching particle system 985
FITZPATRICK, SIMON See Borwein, Jonathan,
FRAPPIER, CLÉMENT Representation formulas for integrable and entire functions of exponential type II 34
FREEDMAN, H. I. See Wu, Jianhong
FUCHS, L. AND E. MONARI-MARTINEZ Butler modules over valuation domains 48

GABARDO, JEAN-PIERRE Tempered distributions supported on a half-space of $\mathbf{R}^n$ and their Fourier transforms 61
GASPER, GEORGE AND WALTER TREBELS On necessary multiplier conditions for Laguerre expansions 1228
GĘBA, K. See Erbe, L. H.
GILBERT, JOHN E. Polynomial invariant theory and Taylor series 1243
GOROSTIZA, LUIS G. See Bojdecki, Tomasz
GOROSTIZA, LUIS G. See Fernández, Begoña
GRÄTER, J. See Brungs, H. H.

GOTTLIEB, ALEX D. AND JOSEPH LIPMAN Group-theoretic axioms for projective geometry 89
GUENNOUN, ZINE E. A. Existence de solutions au sens de Carathéodory pour le problème de Neumann $y'' = f(t, y, y')$ 998
GUPTA, DHARMA P., MOURAD E. H. ISMAIL AND DAVID R. MASSON Associated continuous Hahn polynomials 1263

HANSEN, VAGN LUNDSGAARD AND PETER PETERSEN, V Groups, coverings and Galois theory 1281
HERNANDEZ, GASTON E. AND IOANNIS M. ROUSSOS The Hölder exponent for radially symmetric solutions of porous medium type equations 313
HIGSON, NIGEL AND MIKAEL RØRDAM The Weyl-von Neumann theorem for multipliers of some AF-algebras 322
HOLLAND, W. C. See Droste, M.
HUGHES, KIM Ramanujan congruences for p_k modulo powers of 17 506

ISMAIL, MOURAD E. H. , DAVID R. MASSON AND MIZAN RAHMAN Complex weight functions for classical orthogonal polynomials 1294
ISMAIL, MOURAD E. H. See Gupta, Dharma P.
IVANOV, K. G. , E. B. SAFF AND V. TOTIK On the behavior of zeros of polynomials of best and near-best approximation 1010

JURKAT, W. B. AND R. W. KNIZIA A characterization of multi-dimensional Perron integrals and the Fundamental Theorem 526

KALLIONGIS, JOHN AND ANDY MILLER The symmetries of genus one handlebodies 371
KÁTAI, IMRE See De Koninck, Jean-Marie
KAWAHIGASHI, YASUYUKI One-parameter automorphism groups of the injective factor of type II_1 with Connes spectrum zero 108
KEARNES, KEITH A. Type preservation in locally finite varieties with the CEP 748
KENDEROV, PETÀR See Borwein, Jonathan,
KISS, E. AND M. VALERIOTE Strongly abelian varieties and the Hamiltonian property 331
KNIZIA, R. W. See Jurkat, W. B.
KRANTZ, STEVEN G. AND HAROLD R. PARKS On the vector sum of two convex sets in space 347
KRAWCEWICZ, W. See Erbe, L. H.
KRECK, MATTHIAS AND GEORGIA TRIANTAFILLOU On the classification of manifolds up to finite ambiguity 356

LAGARIAS, JEFFREY C. AND GÜNTER M. ZIEGLER Bounds for lattice polytopes containing a fixed number of interior points in a sublattice 1022

LANG, T. See Wong, R.
LEWIS PAUL W. See Bator, Elizabeth M.
LICHTIN, BEN Periods and the asymptotics of a Diophantine problem II 770
LIPMAN, JOSEPH See Gottlieb, Alex D.
LORCH, LEE , MARTIN E. MULDOON AND PETER SZEGO Inflection points of Bessel functions of negative order 1309
LORING, TERRY A. Berg's technique for pseudo-actions with applications to AF embeddings 119

MACLACHLAN, C. AND A. W. REID Parametrizing Fuchsian subgroups of the Bianchi groups 158
MACPHERSON, H. D. See Droste, M.
MADER, A. See Benabdallah, K.
MADI, NOUR SAÏD Problème de Cauchy à deux variables fuchsiennes 1036
MARTINDALE, W. S. , 3RD AND C. ROBERT MIERS Nilpotent inner derivations of the skew elements of prime rings with involution 1045
MASSON, DAVID R. See Gupta, Dharma P.
MASSON, DAVID R. See Ismail, Mourad E. H.
MCBRIDE, A. C. AND W. J. SPRATT On the range and invertibility of a class of Mellin multiplier transforms III 1323
MERCIER, ARMEL See De Koninck, Jean-Marie
MICHLER, G. O. AND J. B. OLSSON Weights for covering groups of symmetric and alternating groups, $p \neq 2$ 792
MIERS, C. ROBERT See Martindale, W. S. , 3rd
MILLER, ANDY See Kalliongis, John
MONARI-MARTINEZ, E. See Fuchs, L.
MULDOON, MARTIN E. See Lorch, Lee

NAVARRO, GABRIEL Fong characters and correspondences in π-separable groups 405
NELIS, PETER Schur and projective Schur groups of number rings 540
NINOMIYA, YASUSHI Structure of p-solvable groups with three p-regular classes 1559

OLSSON, J. B. See Michler, G. O.
OSKOLKOV, K. I. On functional properties of incomplete Gaussian sums 182

PARKS, HAROLD R. See Krantz, Steven G.
PERKINS, EDWIN A. See Barlow, Martin T.
PETERSEN, V. PETER See Hansen, Vagn Lundsgaard
PIACENZA, ROBERT J. Homotopy theory of diagrams and CW-complexes over a category 814

RAHMAN, MIZAN See Ismail, Mourad E. H.
RAMSAMUJH, T. I. The complexity of everywhere divergent Fourier series ... 413
REID, A. W. See Maclachlan, C.
RESSEL, PAUL See Bloom, Walter R.
RILEY, DAVID M. Group rings with hypercentral unit groups 425
RØRDAM, MIKAEL See Higson, Nigel
ROSA, ALEXANDER See Colbourn, Charles J.
ROUSSOS, IOANNIS M. See Hernandez, Gaston E.

SAFF, E. B. See Ivanov, K. G.
SCHECHTER, MARTIN AND KYRIL TINTAREV Points of spherical maxima and solvability of semilinear elliptic equations 825
SPRATT, W. J. See McBride, A. C.
STINSON, DOUGLAS R. See Colbourn, Charles J.
STRADE, HELMUT Representations of the $(p^2 - 1)$-dimensional Lie algebras of R. E. Block 580
SZEGO, PETER See Lorch, Lee

TANOVIĆ-MILLER, NAZA See Buntinas, Martin
TAUTZ, WALTER , JAAP TOP AND ALAIN VERBERKMOES Explicit hyperelliptic curves with real multiplication and permutation polynomials 1055
TAYLOR, J. C. Brownian motion on a symmetric space of non-compact type: asymptotic behaviour in polar coordinates 1065
TINTAREV, KYRIL See Schechter, Martin
TODORCEVIC, STEVO Remarks on Martin's axiom and the continuum hypothesis 832
TOP, JAAP See Tautz, Walter
TOTIK, V. See Ivanov, K. G.
TREBELS, WALTER See Gasper, George
TRIANTAFILLOU, GEORGIA See Kreck, Matthias

ULBRICH, K.-H. On nonabelian H^2 for profinite groups 213
(See Volume 44 for a corrected version of this paper.)

VALERIOTE, M. See Kiss, E.
VAUGHAN, THERESA P. The normal closure of a quadratic extension of a cyclic quartic field 1086
VERBERKMOES, ALAIN See Tautz, Walter

WALDSPURGER, J-L. Sur les intégrales orbitales tordues pour les groupes linéaires: un lemme fondamental 852
WONG, M. W. Minimal and maximal operator 617

WONG, R. AND T. LANG On the points of inflection of Bessel functions of positive order, II 628
WU, JIANHONG AND H. I. FREEDMAN Monotone semiflows generated by neutral functional differential equations with application to compartmental systems 1098

YAMAMOTO, KAZUHIRO Scattering theory and spectral representations for general wave equations with short range perturbations 435
YU, L. S. See Allegretto, W.

ZHANG, YINGBO The Structure of stable components 652
ZIEGLER, GÜNTER M. See Lagarias, Jeffrey C.
